Professional Summary

I am a Software Engineer with over a year of experience in both front-end and back-end development. Currently, I am working as a freelancer in the web development field and always seek to work on innovative and challenging projects that allow me to improve my skills. I specialize in technologies such as HTML, CSS, JavaScript, React, and Laravel. I am passionate about contributing to meaningful projects that push my abilities and help me grow professionally.

Technical Skills

- **Programming Languages:** HTML, CSS, JavaScript, PHP, SQL, TypeScript
- **Frameworks & Technologies:** React, Laravel, Bootstrap, MySQL, Node.js, Express
- **Tools & Environments:** Git, GitHub, Docker, Nginx, Apache, Composer
- **Libraries & Integrations:** React Router, Tailwind CSS, Axios, Laravel Sanctum
- **Operating Systems:** Windows, Linux
- **Live Broadcasting Services:** Pusher, Laravel Echo

Education

Bachelor's Degree in Computer Engineering
Faculty of Computer Engineering, University of Homs, Syria

Work Experience

Full Stack Developer - "Haraj Syria" Project
Homs, Syria
- Designed a website using Laravel for the back-end and React for the front-end.
- Created API endpoints with Laravel and integrated them with the front-end using Axios.
- Managed and optimized MySQL databases.
- Secured user access and sessions using Laravel Sanctum.

Full Stack Developer
Homs, Syria
- Designed and developed user interfaces using React and Bootstrap.
- Improved user experience with modern CSS and JavaScript techniques.
- Integrated with APIs to display and update real-time data.
- Developed and optimized database handling and ensured high application performance.

Full Stack Developer - Freelance

Currently working as a freelancer

• Develop and maintain web applications using React and Laravel.

• Provide custom solutions for clients and develop small-to-medium-sized projects.

• Optimize application performance and work on user interface and user experience enhancements.

Projects

Haraj Syria: https://haraj-sy.netlify.app/

• Designed a website for buying and selling services and ads tailored to the Syrian market.

• Designed the front-end using React, fully integrated with a Laravel-based API.

• Enabled electronic payments via PayPal and Stripe.

CarBazar - Car Exhibition: https://cars-bazar.netlify.app/

• Designed a web platform for displaying and selling cars in the local car market.

• Designed and developed the front-end using React and Tailwind CSS.

• Developed an API using Laravel to allow users to add, modify, and delete cars.

• Provided advanced search features and filters to help users find cars based on specifications (model, price, color, brand).

• Integrated payment gateways to complete car purchases online.
